Diamond Islands™ Collection Specifications

Board Width:	5" (123mm)	Dimensions per Carton:	16.14 sq. ft.
Board Length:	4' (1212mm)		39.13 lbs. (17.75 kg.)
Board Thickness:	1/2" (12mm)	Installation Method:	Floating
Planks per Carton:	10	Installation Grade:	Above, On or Below

Move Up To The 21st Century!

- OTHER LAMINATES -

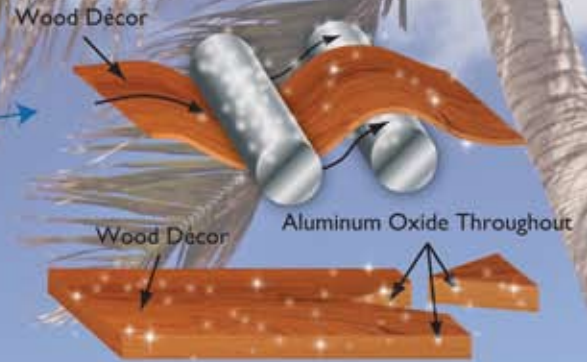

Topical Application of Aluminum Oxide =
CLOUDY WEAR LAYER
INFERIOR DURABILITY

Application
Process

- DIAMONDLIVING™ -

Total Saturation of Wood Décor =
CRYSTAL CLEAR CLARITY
BEST DURABILITY

Aluminum Oxide is pressed only to the top of the substrate which causes a thick cloudy coat to sit on top of the visual wood finish.

- Obscures Image
- "Plastic Look"
- Lower Durability
- 28 gram Aluminum Oxide – Only on top
- Less Total Strength

This process completely saturates the wood décor with Aluminum Oxide which gives you:

- Best Clarity
- Enhanced Realism
- Better Durability than hardwood and most laminates
- 45 gram Aluminum Oxide – Throughout entire wood décor
- Best Overall Strength

Earth-Friendly:

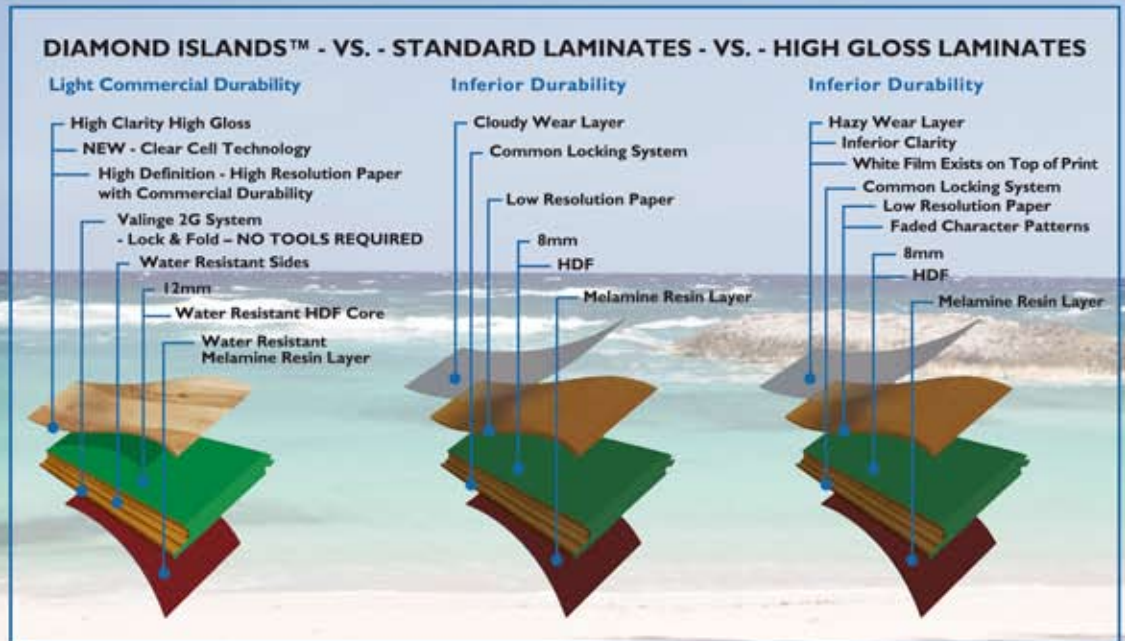

- Eco-Friendly HDF Core
- DiamondLiving™ uses a renewable plantation forest of Poplar Trees that is harvested every seven years and is the ONLY source of wood for the substrate used in this product.

Consumer Friendly:

- Easy to Install
- Easy to Clean & Maintain
- Repairable & Renewable

Product Quality:

- Best Durability in the Industry
- Water Resistant Coated Sides
- Moisture Resistant White HDF Core
- 4-sided Bevel
- Valinge 2G System
